TRAFFIC SIGNS

3M™ MCS™ Warranty

Sign Product Codes in this catalog are pre-built with the best retro-reflective sheeting recommendation that considers MUTCD Compliance, Safety, and Budget Factors. Upgrades to a higher performing sheeting can be made by replacing the retro-reflective sheeting letter/number within the parenthesis (_). Diamond Grade Fluorescent Yellow upgrades are available by adding a **Y** to end of the code - Example: S2412W44APL(3)A(Y) | S3636W13R(3)A(Y)

CODE	Sheeting Name	Sheeting Description
H	**3M** High Intensity Prismatic	*The most common sheeting type for signs in America today.* Meets retro-reflectivity requirements. **ASTM Type III & IV** | Standard **3M** 10 year warranty.
3	**3M** DG³ Diamond Grade™ Cube	*The highest performing retro-reflective sheeting.* **ASTM Type XI** | Standard **3M** 12 year warranty.
3Y	**3M** Fluorescent DG³ Diamond Grade™ Cube	*The highest performing retro-reflective sheeting in fluorescent colors that enhances day/nighttime visibility.* **ASTM Type XI** | Standard **3M** 7 year warranty.
D	*Special Order* **3M** VIP Diamond Grade™	*A high performance sheeting* from the 3M™ Diamond Grade™ line of retro-reflective sheeting. **ASTM Type IX** | Standard **3M** 12 year warranty.
E	Engineer Grade Prismatic	Yellow and Orange do *NOT* meet retro-reflective requirements and should *NOT* be used on traffic signs. **ASTM Type I** | No warranty.
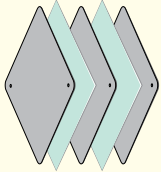

Storing Signs Tip

Signs should be stored vertically in racks, indoors, kept dry and interleaved with 3M sheeting liner with the glossy side against all sign faces.

Quick Tip

The use of 3M's Matched Component System insures your investment. When signs are created with high quality 3M sheeting and components, the sign performance is backed by 3M warranties. The MCS guarantees that signs will remain effective for their intended use and meet minimum values for retroreflection for the specified warranty period. The use of any non-3M materials in conjunction with 3M products will void all warranties.

Replacement Requirements*

Regulatory signs are important to maintain as the absence of, or damage to, could quickly result in or contribute to a severe crash.

Damaged or missing regulatory signs should be replaced or repaired *within hours* of the agency having notice of them missing, down or damaged.

*Maintenance of Signs and Sign Support: FHWA-SA-09-025

Are Your Signs Bright Enough?

Type I is allowable on "Red Series" signs, i.e., STOP and YIELD signs; however: We recommend

3M **DG³ Diamond Grade** or **HIP** for all **Regulatory Signs** for the best overall value and warranty included.

Dating Stickers

3 ways to implement the **Expected Sign Life** or the **Blanket Replacement Method** of maintaining traffic sign retro-reflectivity.

Expected Sign Life METHOD:
Signs must be replaced before they reach the end of their expected sign life. An agency must have documentation of expected replacement for individual signs.

Blanket Replacement METHOD:
The agency will replace all the signs in an area or of a specific series at given intervals. The agency can use stickers that specify installation dates to help them know when to replace all the signs in the area or series

Specify Year when ordering.
Material: (H) High Intensity Prismatic

GENERIC DATING STICKER

MUTCD Guidance:

A **White Retroreflective Strip** not less than 2 inches in width shall be used on the back of each Crossbuck sign, unless installed back-to-back or on one way street.

A white reflective strip shall be used on the front and back of all supports at passive highway-rail grade crossings extending from the bottom of the sign or plaque to within 2 feet above the ground.

Brite-MAX

Post Multi-View or Single View Reflectors enhance conspicuity of sign supports and meet MUTCD requirements.

- All Brite-Max Post Reflectors may be stacked for more effectiveness.
- Utilize a Brite-Max Post Reflector on both sides of a post in the same or different colors to further delineate the roadway.
- **Compatibility:** Fasten Single or Multi-View Post Reflectors to U-Channel, square, wood posts with mounting hardware, or mount to round posts using standard round post to traffic sign brackets. Brackets and hardware, sold separately.
- **NOTE:** Standard available sizes, colors and sheeting combinations shown, custom combinations available.

MUTCD Guidance
Enhanced Conspicuity for Standard Signs (Section 2A.15)

Brite Max Post Reflectors are 30", 36", 48", 60", 72", or 84" Long. Combinations of them may be used so that they meet the MUTCD requirement of covering the full length of the sign support from the sign to within 2 feet above the edge of the roadway. They shall match the background color of the sign, except that the color of the strip for the YIELD and DO NOT ENTER signs shall be red. Passive highway-rail grade crossings require Brite-Max Post Reflectors on the front and back of the sign supports.

Color Definitions

- **WHITE:** Use under white signs and plaques; such as Speed Limit, Intersection and Lane Control, Passing and Guidance, and Highway-Rail Grade signs.
- **YELLOW:** Use under yellow signs and plaques; such as Warning, Passing, Vehicular, Non-Vehicular, Neighborhood, Child Safety, Highway-Rail Grade, Roadway Conditions and Advance Traffic signs.
- **RED:** Use under red signs and plaques; such as Stop, Yield, Do Not Enter, All Way or Wrong Way signs.
- **FLUORESCENT YELLOW-GREEN:** Use under signs in school zones.
- **ORANGE/FLO ORANGE:** Use under signs in construction work zones.

◆ Utilize Brite-Max Delineators for many other purposes such as utilities, incident management, parks and recreation areas. Standard reflective sheeting colors available by custom order.

MUTCD Guidance

About Delineators

◆ Delineators are beneficial at locations such as at lane-reduction transitions and curves and provide effective guidance at night and during adverse weather conditions. Refer to the MUTCD for more information.

◆ Retroreflective elements for delineators shall have a minimum dimension of 3 inches.

◆ Delineators are considered guidance devices rather than warning devices.

◆ Delineators may be used on long continuous sections of highway or through short stretches where there are changes in horizontal alignment.

Color Definitions

◆ **WHITE:** Lane markings or to mark the right pavement edge.

◆ **YELLOW:** Separate traffic moving in opposite directions, or mark the left pavement edge on one-way roadways.

◆ **RED:** Used to warn motorists of "Do Not Enter" or "Wrong Way". Also, delineators shall be red when used on a truck escape ramp.

◆ **BLUE:** Used to mark the location of fire hydrants on the shoulder or at the curb.

◆ **GREEN:** Used for snowplow markings.

◆ **ORANGE:** Used in construction work zone areas.

About Object Markers

The purpose of object markers is to mark obstructions located within or adjacent to the roadway including underpass piers, bridge abutments, handrails, ends of traffic barriers, utility poles, and culvert headwalls. Other roadside conditions, such as narrow shoulders, drop-offs, gores, small islands, and abrupt changes in the roadway alignment, that might make it undesirable for a road user to leave the roadways, also create a need for a marker. Refer to MUTCD for more information.

Did You Know?

Traffic & Custom Signs, both traditional and digitally printed are manufactured to the 3M Matched Component System standards.

The use of 3M's Matched Component System insures your investment. When signs are created with high quality 3M sheeting and components, the sign performance is backed by 3M warranties. The MCS guarantees that signs will remain effective for their intended use and meet minimum values for retroreflection for the specified warranty period. The use of any non-3M materials in conjunction with 3M products will void all warranties.

Sign Backers
Laminate Vinyl offers the most cost effective option while retaining the classic feel of the ornamental system. Durable black vinyl is applied to the back of the traffic sign. This option is not visible from the front side of the sign.
.080 Aluminum Plates offer a lighter weight alternative to Steel Frames while retaining the classic feel of the ornamental system. Oversized by 3" for a defined 1.5" black border around the sign. Punched and radius to match sign. Powder coated semi-gloss black.

Steel Sign Frames include a steel backer plate welded to angle iron. Frames have a .75" radius and standard .375" holes to match the sign. Powder coated semi-gloss black.

3M™ MCS™ Warranty

Leave an Impression with a Comprehensive Branding Program

◆ Let us help you design and develop your own comprehensive branding program.

◆ A robust line of products and services to help you develop and implement your program from your smallest and simplest to your largest and most complex sign.

◆ Utilize the standard design elements and plethora of sign products and mounting systems to create a fully integrated program. Your program will not only be aesthetically pleasing but direct visitors to sites more easily, creating safer roads and visitor satisfaction.

◆ Comprehensive Branding Programs are ideal for communities, subdivisions, complexes, campuses, facilities, parking areas and garages, businesses, buildings and entrances plus wayfinding, metro street name signs, city entrance guide signs and ground mounted street name signs.

◆ Check out all of the comprehensive branding program elements shown here; on pages 32 and 33.

Design Uniformity

Easily elevate the look of your sign program through Uniformity, to achieve a clean, aesthetically-pleasing appearance that will impress for years to come. Follow Design Standards and utilize the uniform shapes, design styles, colors, fonts and mounting systems for your entire sign program.

Sign Reflectivity & Substrates

Signs utilize durable DOT Grade raw materials on most signage to ensure a time tested, proven performance. 3M High Intensity Prismatic (HIP) Reflective Sheeting and .080" thick aluminum are our most common substrates but others are available by special quote. Also, many of our unique mounting systems allow the option of a double-sided sign.

Sign Sizes

Signs are available in a multitude of sizes for all scale applications from a single letter or number to large signs for identification and navigation.

Sign Shapes - Standard & Contoured

Create a distinctive look for your system by choosing a standard sign shape (see pages 100-101) or a contoured shape from one of our 31 routed shapes (see pages 26-27).

Sign Legends

Utilize a mixture of standard, semi-custom and custom legends to build your comprehensive branding program quickly without the need to re-invent common and standard legends. This not only saves you time, but money allowing you to get the most out of your budget.

Sign Fonts

The preferred sign font is Highway Gothic. This standard highway font offers maximum visibility and legibility at a distance and at higher speeds.

Already have an established font? Or looking for something different or fancy? Your signs can be designed with many other fonts, by request. Not sure what font to choose? Contact us, we can help!

Sign Logos

Show pride in your business or community by adding your logo to any sign. Don't have a logo? Ask about an icon to add some pizazz to your sign such as a star, heart, leaf, tree, seashell, animal, etc. *NOTE: Please request information on logo requirements and design service fees for non-production ready artwork.*

Sign Backers

We got your back...Don't let that single sided sign back go unfinished. Complete the look by adding a Sign Backer to your single-sided sign. Choose from premium quality Steel Frames, Aluminum Plates or Vinyl Laminate backer options to put the finishing touch on your signs (see page 24).

The possibilities are limitless with a Comprehensive Branding Program

Standard Color Chart for Sign Colors

Add some flair to your branding program by utilizing the 20 colors in the Standard Color Chart to design your sign. Start by choosing a color for the Legend (Copy/Graphics/Border) and then select a color for the background. The option to add gold pinstriping to a white border is available at no extra charge. *NOTE: Pantone Color Matching Service available by request.*

3M™ Matched Component System

The use of 3M's Matched Component System insures your investment. When signs are created with high quality 3M sheeting and components, the sign performance is backed by 3M warranties. The MCS guarantees that signs will remain effective for their intended use and meet minimum values for retroreflection for the specified warranty period. The use of any non-3M materials in conjunction with 3M products will void all warranties.

3M™ MCS™ Warranty

3M™ MCS™ Warranty

Manufactured by a leader in the U.S. outdoor sign industry since 1985.

◆ Customer service, sales and production expertise on federal laws regarding traffic and guide signs gives us a unique advantage in the wayfinding industry.

◆ This expertise translates into wayfinding signage that engages your visitors with highly visible, easily readable and beautifully designed products that are built to last.

◆ We provide personal service thru our extensively trained staff that listen to your wish list and guide you throughout the process of your project, big or small. You'll never get an off-site customer service representative reading from a script.

◆ Components are made of high quality materials, and design is never compromised. Explore the Comprehensive Branding program outline on pages 30-31 for more detailed information on the components of a finished sign project.

Sign Panel Bracket Mounting System

◆ Utilize the versatile sign panel brackets to mount a wayfinding sign on 1 post or between 2 posts.

◆ Choose post bases and caps to complete the look.

◆ Be creative with the routed sign shape orientation to explore multiple design layouts possible.

◆ Utilize similar routed shapes to create a coordinated branding program.

3-Sided System

The triangle display (shown below) utilizes the round post sign panel brackets to mount wayfinding signs between 3 round posts.

JackJaw® Post Extractors

JackJaw® Extractors make an easy task of pulling stakes and posts driven in soil. JackJaws can not be used for removing post embedded in concrete - soil installations only. With a couple pumps of the handle, stakes and posts break loose. The jaw and lever mechanism allow you to pull stakes and posts straight up out of the ground without bending them, preserving the posts and stakes for hundreds of repeated uses.

◆ The Rhino® HPD 60 is a high-performance hydraulic post driver is perfect for fencing, road signs, farm, ranch, forestry, vineyards, guardrail, anchors, tent stakes – essentially any driving job. Capable of driving nearly any post profile, this driver is a hydraulic powerhouse! For taller applications utilize the remote valve.

◆ Unlike other hydraulic drivers the RHINO® HPD 60 is nearly maintenance free. Continuous component lubrication keeps maintenance at a minimum and extends tool life.

◆ The RHINO® HPD 60 can be used with the HPP 18V Power Pack as well as other hydraulic power systems such as utility truck or mini excavator with the use of Rhino's flow control devices.

Rhino Hydraulic Flex Power Packs are superior to other brands due to the cooling system that allows the hydraulic pressure to remain stronger than the competition once it gets hot.

Replacement Requirements*

0 DAYS

Work Zone signs should only be used in "new" or "like new" condition and replaced immediately if missing, damaged or deteriorated. While they are temporary signs, condition is extremely critical because travel through work zones can be hazardous with unexpected or unusual conditions.

*Maintenance of Signs and Sign Support: FHWA-SA-09-025

Are Your Signs Bright Enough?

All Ground Mounted Warning Signs MUST be Type II Reflective or better. All Roll-Up Signs used at night MUST be retro-reflective. To stay in compliance with the MUTCD, we recommend using:

- Applied with pressure sensitive adhesive.
- Designed for application on asphalt and portland cement concrete road surfaces.
- These markers provide highly effective, long-life visibility, particularly at night and in wet weather.

Ceramic Traffic Buttons & Jiggle Bars — DROP SHIPS

Retro-Reflective Ceramic Markers combine the power of brilliant and exceptional night time visibility with a self cleaning glazed surface for excellent daytime visibility.

Non-Reflective Ceramic Markers are maintenance free and feature a heat fired glazed surface that promotes self-cleaning and excellent daytime visibility.

Key features of Portable Concrete Barrier Markers

◆ Brite-Max BMJBs are becoming DOT approved nationwide in states which prefer durable aluminum over plastic!

◆ Plastic PCBMs meet specifications nationwide.

◆ Also known as a "Jersey" Barrier Marker. Typical applications include temporary and permanent concrete barriers, concrete bridge parapets and wooden guardrail posts. BMJB bases are pre-drilled for either adhesive or bolt mounting.

◆ **Installation:** BMJBs have 3/8" holes pre-drilled for permanent 5/16" hardware installations. Use adhesives for a quick, reliable and less labor intensive installation. Standard pavement marking adhesives are available for purchase. Also, Dapco brand 795A Adhesive (RPMAEPOXYTUBE1P) is available through special order.

MUTCD Guidance

About Delineators

- ◆ Delineators are beneficial at locations such as at lane-reduction transitions and curves and provide effective guidance at night and during adverse weather conditions. Refer to the MUTCD for more information.
- ◆ Retroreflective elements for delineators shall have a minimum dimension of 3 inches.
- ◆ Delineators are considered guidance devices rather than warning devices.
- ◆ Delineators may be used on long continuous sections of highway or through short stretches where there are changes in horizontal alignment.

Color Definitions

- ◆ **WHITE:** Lane markings or to mark the right pavement edge.
- ◆ **YELLOW:** Separate traffic moving in opposite directions, or mark the left pavement edge on one-way roadways.
- ◆ **RED:** Used to warn motorists of "Do Not Enter" or "Wrong Way". Also, delineators shall be red when used on a truck escape ramp.
- ◆ **BLUE:** Used to mark the location of fire hydrants on the shoulder or at the curb.
- ◆ **GREEN:** Used for snowplow markings.
- ◆ **ORANGE:** Used in construction work zone areas.

◆ **Material:** .040" Aluminum

◆ The flexible bands are designed to wrap around utility poles, as well as marking transformer covers, and other potential hazards for pedestrians and motorists. Suitable for both rural and urban areas.

◆ **Compatibility:** 36" long reflectors fit 11.46" diameter utility poles and 60" long reflectors fit 19.09" diameter utility poles.

◆ **Installation:** Reflectors can be cut with tin snips to mark poles with other diameters. The .040" aluminum is both rigid and flexible, which allows quick and easy installation around wood utility poles using roof nails, staples, or screws. A combination of these fasteners as well as adhesives can be used to mount them to other surfaces. Tools, hardware and adhesives, sold separately.

◆ Utility-View Reflectors can be ordered with VHB tape on the back, in other colors and with reflective or non-reflective numbers to better identify locations.

Surface Mount Tubular Marker

In accordance with MUTCD Tubular Markers versus Tube Delineators

Delineator: a retroreflective device mounted on the roadway surface or at the side of the roadway in a series to indicate the alignment of the roadway, especially at night or in adverse weather.

Tubular Markers may be effectively used for emphasis of pavement marking patterns including • opposing lane dividers of traffic • dividing traffic when two or more lanes are kept open in the same direction • channelizing traffic in exit only applications • urban turn restrictions • indicating changes of alignment in the roadway • delineating edge of pavement drop off where space limitations do not allow the use of larger systems.

◆ Shall be made of a material that can be struck without causing vehicle damage.

◆ Day and low speed roadways (40 MPH or less). Requirements: 18" minimum height with at least (1) one 3" retro-reflective stripe.

◆ Night and high speed roadways (45 MPH or higher) Requirements: 28" minimum height with (2) two retro-reflective stripes that are between 2" - 3" wide.

◆ Channelizer Stripes shall begin 2" from the top and have 2" - 6" between stripes

◆ Marker Tube Diameter shall be a minimum of 2" with 2" - 3" outside diameters being the most common.

◆ Tubular Markers shall have permanently affixed bases or have weighted portable bases.

◆ Lane separators shall be crashworthy.

◆ In TTC work zones, Tubular Markers should only be used where space restrictions do not allow more visible devices.

Helpful Hint:

◆ White Reflective Sheeting separates same direction traffic flow or supplements right edge white lines.

◆ Yellow Reflective Sheeting separates opposite direction traffic flow or supplements left edge yellow lines.
